

R documentation

of 'DASplusR.Rd'

October 4, 2007

DASplusR

DAS+R

Description

Opens the DAS+R commander and enables the GUI.

Usage

DASplusR()

Arguments

none

Details

This description is essentially for the listing of names of relevant functions.

Conventions: Functions which are used by the GUI and are clickable, start with a capital letter and end with the characters 'GUI', others (running under R without GUI, e.g. in batch) of which call might also appear in the script window, should have similar names but start with a small letter. The latter functions are the working horses, containing all the possible parameters, while the capitalized functions usually have no argument and get the specifications from the GUI.

Names:

Group	GUI	R Function
Summary Worksheet	SummaryGUI	summaryDAS
	WorksheetMenuGUI	worksheet
	WorksheetDeleteGUI	
	SizeMenuGUI	
	WorksheetMenuGUI	worksheetFrame
		activeFrame
		frameColor
	SaveWorksheetGUI	saveWorksheet
	LoadWorksheetGUI	loadWorksheet

Diverses		worksheetExists
Xyplot	XyplotGUI	xyplotDAS
Ternary	TernaryGUI	ternaryDAS
FitBackground	FitBackgroundGUI	fitBackground
	ConvertBackgroundGUI	convertBackground
	PlotBackgroundGUI	plot.SpatialPointsPictureFrame
		plot.Picture
Background	LoadBackgroundGUI	load
	ConvertBackgroundGUI	convertBackground
	PlotBackgroundGUI	plot
	SaveBackgroundGUI	save
Mapping	SymbolMapGUI	symbolMapDAS
	ProportMapGUI	proportMapDAS
	SmoothingMapGUI	smoothingMapDAS
	MakeBorderGUI	makeBorder
		save
	LoadBorderGUI	load
	PlotBorderGUI	plot
Princomp A.	PrincompGUI	princompDAS
	ScreeplotGUI	screeplotDAS
	ExportCompGUI	exportComp
Factor Anal.	FactanalGUI	princompDAS
	ExportFactorsGUI	exportFactors
	FactplotGUI	factplot
Biplot	BiplotGUI	biplotDAS
